Projects

Pharmacy App, full-stack app 🔗

It has two major sections: an Admin Dashboard for managing products, orders, and other operations and a Client Section where users can browse products, search, add to cart, and manage orders.

Ezz-portfolio 🔗

This website showcases my work, projects, and skills as a front-end developer. It's a hub for anyone who wants to learn more about my journey, the technologies I work with, and the projects I've built.

Zag-eng family 🔗

Web-based platform that allows users to search, and manage data from various providers.

Foodies 🔗

Web application that enables users to see meals, view variant of food and can share you own meal.
